Facts & figures

About us: a pioneering online university

A global university born in the digital age

Figures from the 2022/2023 academic year.

87,150
students

113,500
graduates

59 % identify as women

41 % identify as men

41 % between 25 and
34 years old

90 % study and have a
job

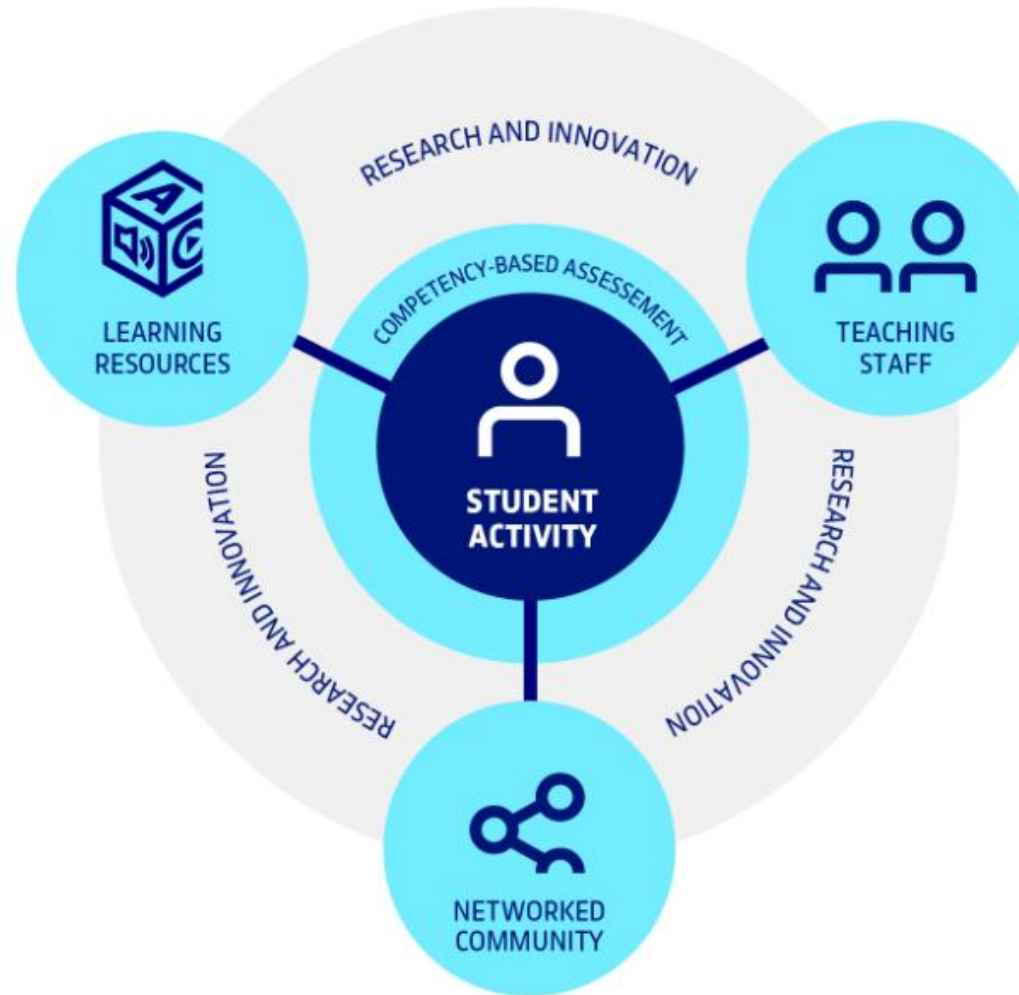

57 % identify as women

43 % identify as men

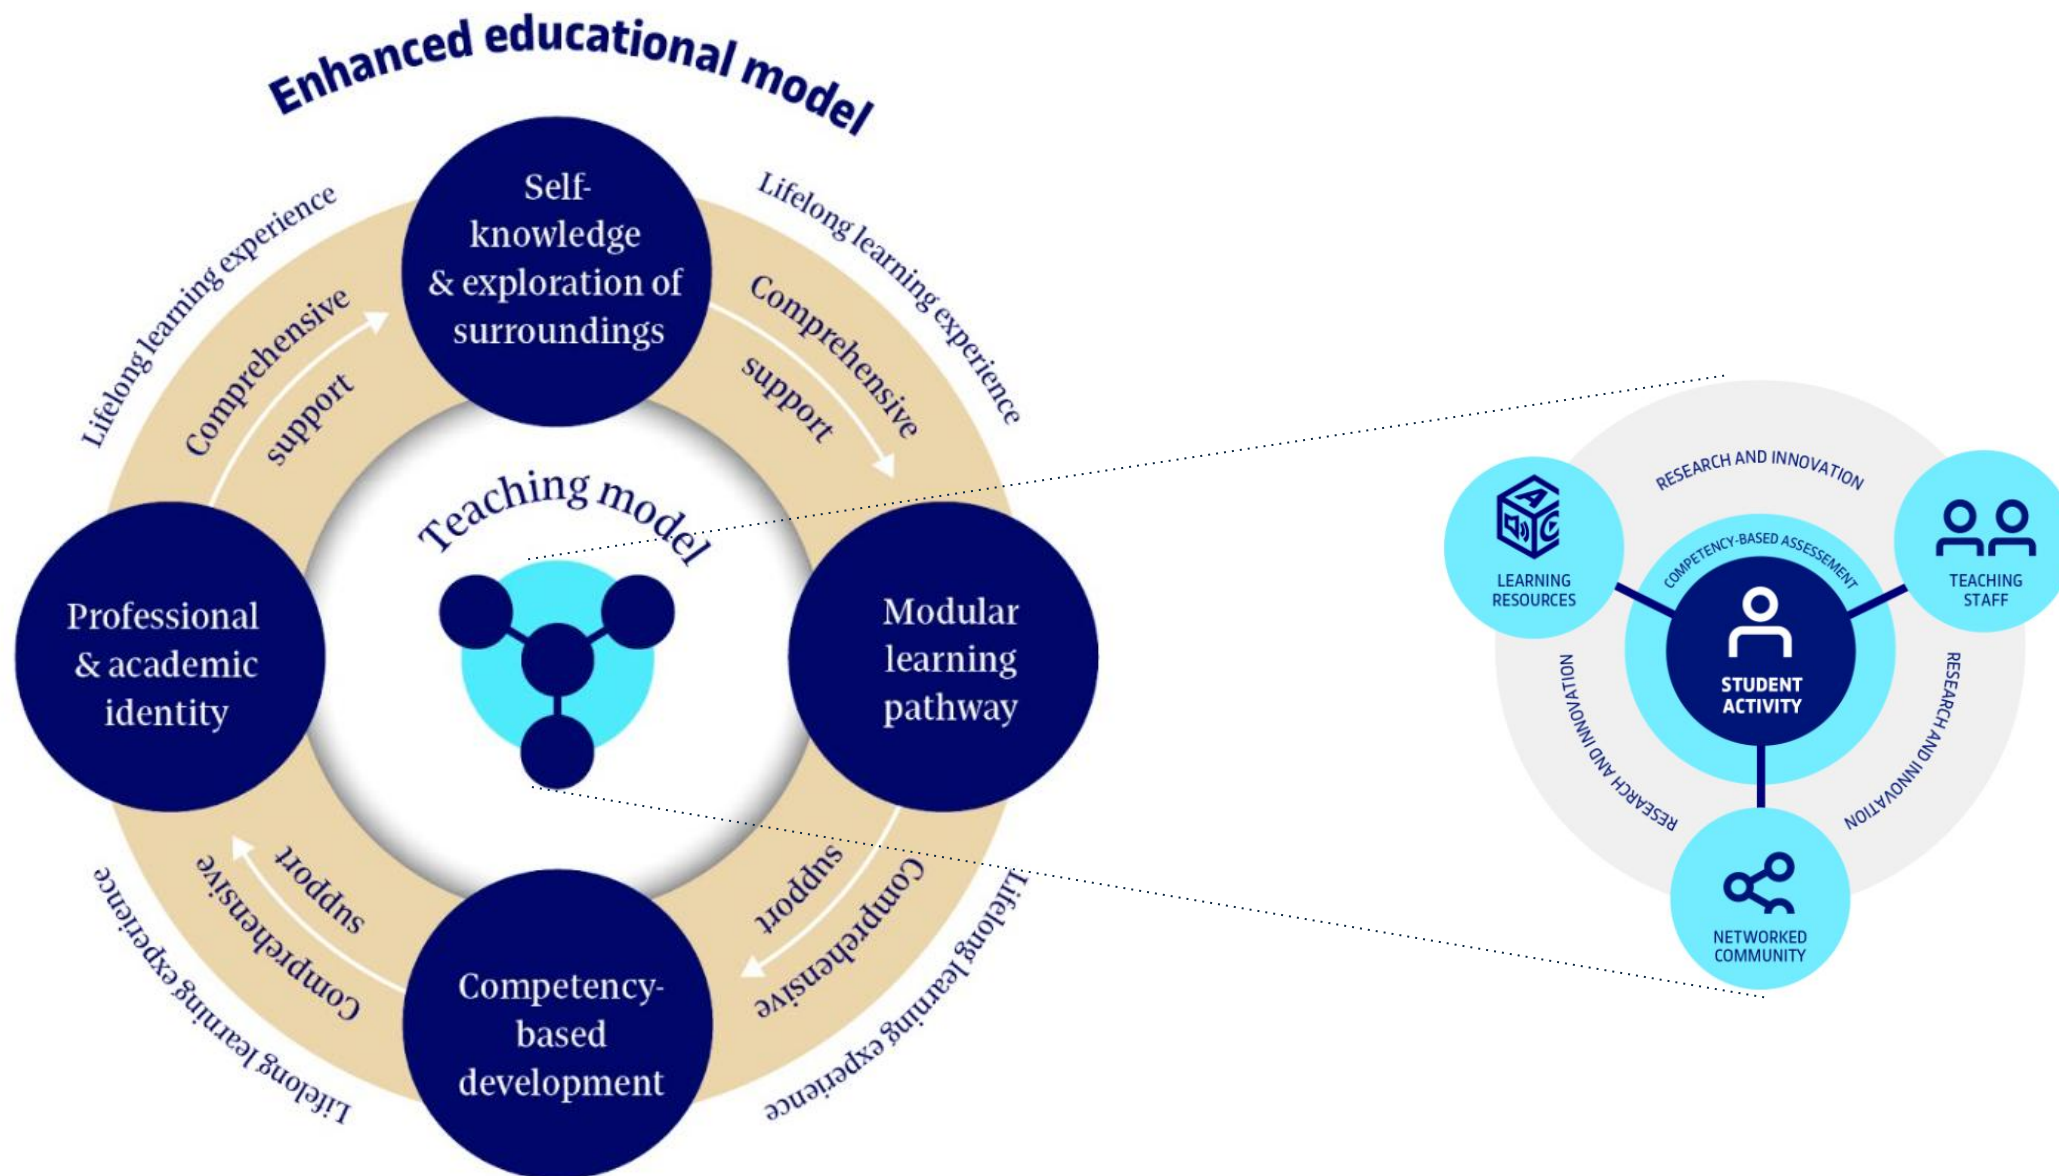

85 % would choose the
UOC again

84 % would choose the
same degree
again

UOC's Classic Educational Model

UOC's Enhanced Educational Model

1. Self knowledge & exploration of labour market

Student story:

- I Imagine My Future by Understanding My Starting Point

Drivers

- **Self-awareness, career guidance, and informed decision-making**

Objective

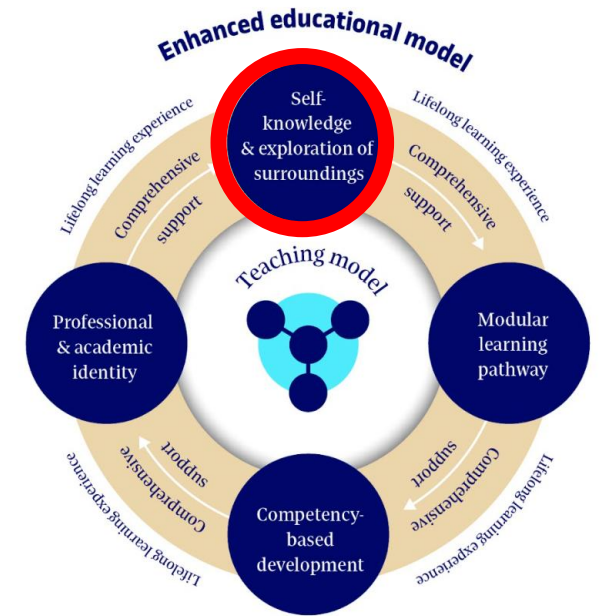

- To support students at the very beginning of their academic journey so they can make informed and meaningful decisions, based on a deeper understanding of themselves and their context.

Background

- Students arrive with diverse backgrounds, experiences, and motivations.

Key Message

- From day one, we empower students to understand who they are, what they want, and how to get there

2. Modular Learning Pathways

Student story:

- Start My Journey by Building My Learning Path.

Drivers

- **Pathway construction, personalization, and community.**

Objective

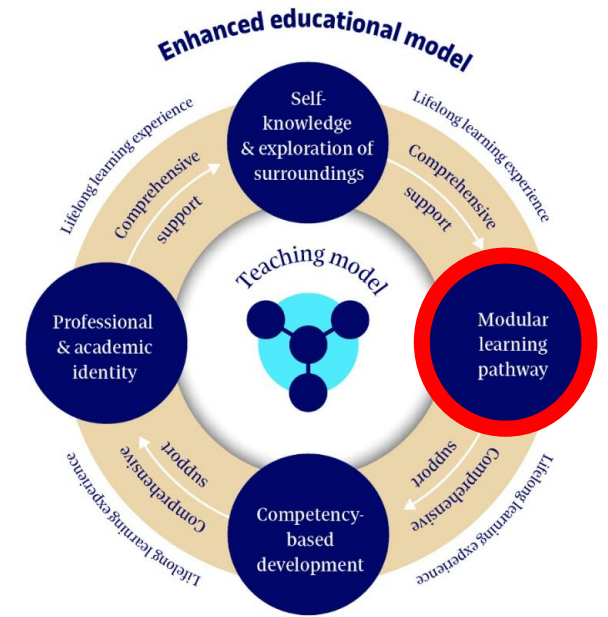

- To enable students to build a modular, flexible and meaningful academic pathway, supported by continuous guidance and relevant information.

Background

- Each student starts from a different context and pace.
- Traditional academic programs are often rigid and linear, offering limited room for adaptation.
- Students need tools and support to make choices and adjust as they move forward.

Key Message

- We help students build a flexible and evolving pathway that adapts to who they are and

3. Competency Based Development

Student story:

- I Learn and Evolve by Making My Progress Visible

Drivers

- **Competency development, evidence,** and **validation**

Objective

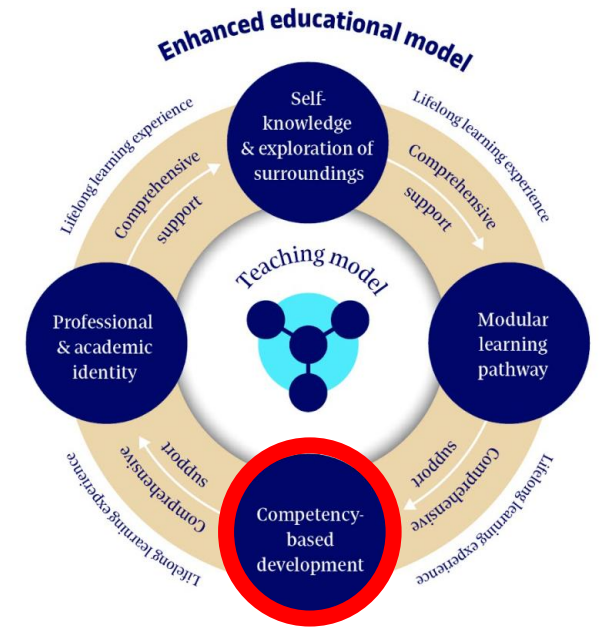

- To promote the development of meaningful competencies and provide students with mechanisms to recognize, monitor and showcase their learning progress.

Background

- Students often don't perceive their own learning process or how it aligns with professional expectations.
- Traditional assessment systems may not make progress visible or portable.
- There is **a growing need** for evidencing competencies in ways that are valuable for the student and recognisable by others.

Key Message

- We help students become aware of their learning and make their progress visible, traceable and recognised.

4. Professional & academic identity building

Student Story

- I Project Myself to the World by Building My Professional Identity

Drivers

- **External projection, professional identity,** and **connection with the world**

Objective

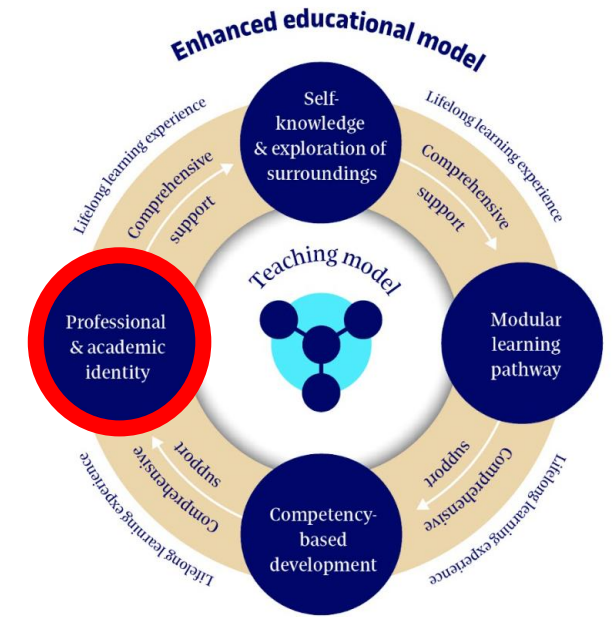

- To support students in making their personal and academic journey visible and valuable beyond the university, reinforcing their professional identity and employability.

Background

- Students need to build a coherent and credible identity that reflects their academic and personal development.
- There is a growing demand for visibility of competencies and achievements in academic and professional networks.
- Career transitions increasingly depend on evidence of skills and self-presentation.

Key Message

- We help students turn their learning into identity, their progress into visibility, and their story into value.
